Projects

- Application Portal: Collaborated with other developers to create an application portal, which is live and actively used. React was the primary technology used in its development.
- Tech meet Website: Collaboratively built a platform for developers to interact, post and message each other using HTML, CSS, JavaScript and React within an agile methodology.
- E-commerce store: Developed an efficient online shopping platform, utilizing sanity as the backend and HTML, React, Next.js 13 and Tailwind.
- Calculator: Designed and implemented a fully functional calculator using HTML, CSS and JavaScript.
- Word and Number Guessing Game: Created an interactive word and number guessing game with a timer, hints, and multiple chances for users using HTML, CSS and JavaScript.
